

Tier

```
classDiagram
    class Tier
    class Elefant
    class Meerschweinchen
    Elefant --|> Tier
    Meerschweinchen --|> Tier
```

A UML class diagram illustrating inheritance. At the top is a rectangular box labeled 'Tier'. Below it are two more rectangular boxes: 'Elefant' on the left and 'Meerschweinchen' on the right. A vertical line connects the bottom center of the 'Elefant' box to the bottom center of the 'Tier' box, ending in an open upward-pointing triangle. Similarly, a vertical line connects the bottom center of the 'Meerschweinchen' box to the bottom center of the 'Tier' box, also ending in an open upward-pointing triangle. This indicates that both 'Elefant' and 'Meerschweinchen' inherit from the 'Tier' class.

Elefant

Meerschweinchen
